AXIUM AX-MINI 4 & KPC-N

Axium AX-MINI 4 & KPC-N

Streaming Amplification meets touchscreen control

4 Zones, 4 Sources & 1 Keypad

The AX-Mini 4 features 4x powered zones delivering 30 watts per room and 2x assignable digital outputs, you probably already knew this, but did you know that the KPC-N keypad is available pre-programmed to control all 4 zones and sources of the Mini 4?

Connectivity is a breeze with both direct connection using the RJ45 keypad port via a PoE network connection. The KPC-N comes packaged with both WHITE and BLACK faceplates in the traditional full size wall plate or the EURO square finish.

If you wish to purchase a KPC-N keypad to add to your system we can provide a pre-designed layout free of charge allowing you to control the four zones of the Mini 4. We have two themes available, Axium's classic Cosmos layout or the bold Darkness theme. Both themes are also available in a single zone configuration if required.

All variations allow for a ZERO PC configuration installation, all the source and zone names are setup with Axium's DYNAMIC naming functionality. This means that source and zone names are taken directly from the amplifier without the need for you to even turn on a computer! Simply connect your phone or other mobile device (iOS or Android) to the same network and name the zones and sources via the web setup page and the keypad will automatically update. Full feedback is supported, giving instant visual feedback on Source selection, Volume, Power and Media Playback status. There is even a global view to see what all the zones are currently doing!
