MODEL: AX-AMM2
MEDIA MANAGER

Spotify

Endless Music

The four powered stereo outputs deliver an enviable 30 watts per room, simply add more Mini4's to expand up to 32 rooms. This is a hidden audio system that can fill your world with music.

One Optical and one RCA input via the Baltx2 and one additional RCA input on the Mini4 connects your favorite devices so you can hear them everywhere along with two configurable Digital Input or Output connections.

When used in conjunction with the AX-AMM Media Manager, internet streaming sources lets you play music from thousands of internet radio stations from TuneIn Radio, listen to Spotify Connect, Tidal or from your mobile device, even from network attached storage, all controlled by an auto discovery app (iOS and Android) or keypads that put you in control.

Unrivalled Control

The internal webpage has all the customization needed to control and configure the system the way you like it. The **FREE** app (iOS and Android) auto discovers the Amplifier so there is no complex setup.
Two keypad ports allow for wall mounted keypads to control your system or use the KPC-N 2.8" wall mounted color touchscreen where all zones can be controlled.

Audio Control

Adjustable Bass, Treble, Balance, Loudness and audio delay fine tunes your system to your exacting needs.

Prepare to be spellbound
in as many rooms as you need....

AXIUM AX-AMM2 MEDIA MANAGER

Play from your mobile device

The AMM2 has been re-engineered. We have included an HDMI output connection to connect the AMM2 directly to a home theatre receiver or TV as well as the AMM2 having a Line Out Analogue connection.

HDMI Output, Line Out, USB input and 8 network streams total

The AX-AMM2 features 1 x HDMI output and 1 x Lineout with 8 internal network streamers. The AX-AMM2 supports Apple Airplay, Spotify Connect, Pandora accounts, TuneIn radio, USB, Network shares (UPnP, SMB), play from your device and Axium Favorites. The AX-AMM2 supports a large list of audio files. Included in this list is AAC (MPEG4), FLAC (lossless) and WAV files. The AX-AXMM supports up to 96 kHz sampling rates.

Simple setup

Complete customization is also available via ADP where you can (among other things) select what streaming services to allow. Plug the AMM2 into the network along with an Axium AX-Mini4 or AX-1250 amplifier for quick and easy plug and play connectivity when using the Axium mobile Self-discover app.

Any source from any amplifier and the Media Manager can be accessed in any Zone
