

## Joining multiple areas to Spotify Connect

1: Spotify Connect does not currently allow for additional areas to be joined together within their app. The solution for listening to the same Spotify music source in other areas is as follows.

Open the Spotify Connect App, select your music then select the area from the devices tab.

This example is using the Lounge area.

## Joining multiple areas to Spotify Connect

5: Re open Spotify Connect, the main area along with the other areas added are now joined playing the same music source. i.e. Lounge & Kitchen. To Separate an area away from the Spotify stream simply change the source or turn the zone Off in the Axiom Mobile App.
