

Welcome to the Digital connections Setup for the Media Manager using the Axiom AX400/AX800 Legacy amplifiers

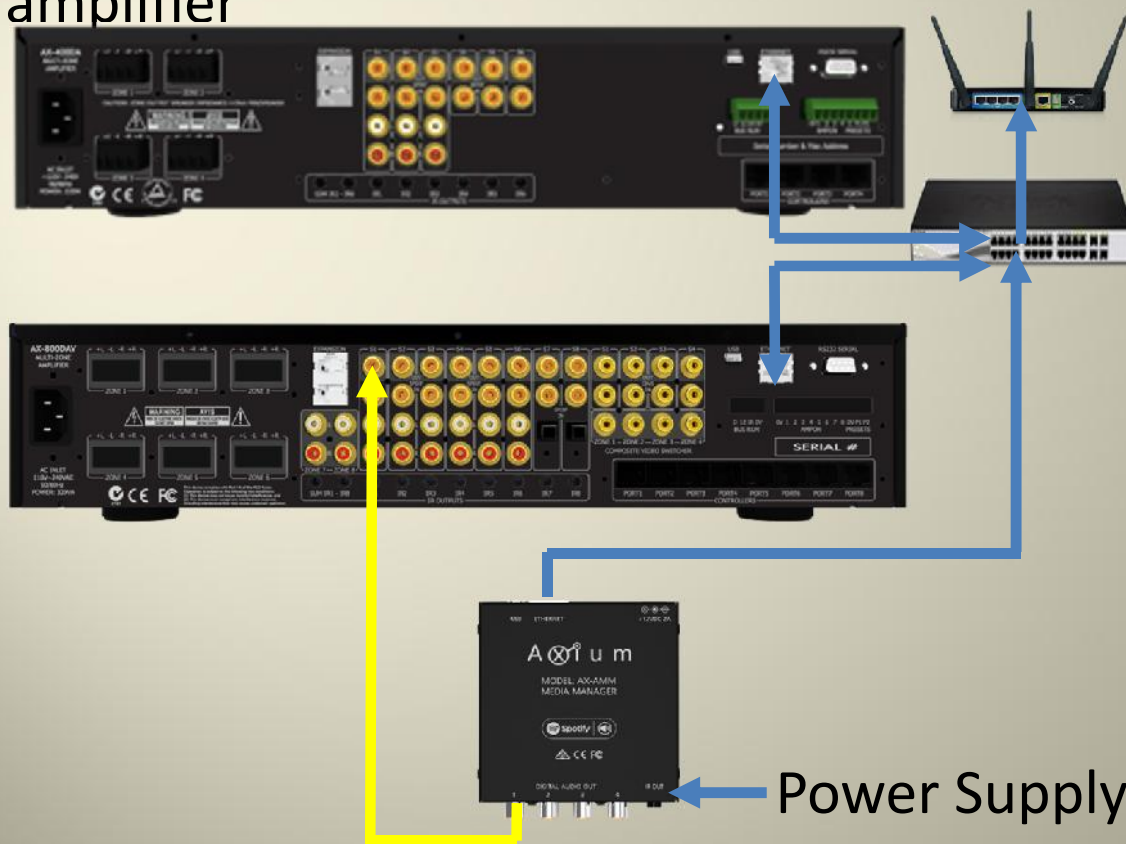

Axiom

Audio & Control
Systems

Media Manage Digital connections

Ensure that either the AX400/AX800 and the Media Manager are connected to the same Network switch and are all powered. Connect the digital output/s to the digital input/s on the amplifier

Axiom

Audio & Control Systems

Power Supply

Media Manage Digital connections

Ensure the Android or Apple mobile phone or tablet device is connected to the same network as the Amplifier and the Media Manager.

Navigate to either the Google Play or Apple App store and search for the FREE Axiom App

Axiom

Install

Axiu m

Audio & Control Systems

Media Manage Digital connections

Once the mobile app has been installed, click on the Axiom app icon on your device to launch.

Axiom

Audio & Control
Systems

Media Manage Digital connections

The app will self detect the amplifier and Media Manager on the same network and pre populate your mobile device with a template

Axiom

Audio & Control Systems

Media Manage Digital connections

Both the AX400/800 and the Media Manager require digital outputs and inputs to be mapped. Press the cog icon at the top of the app.

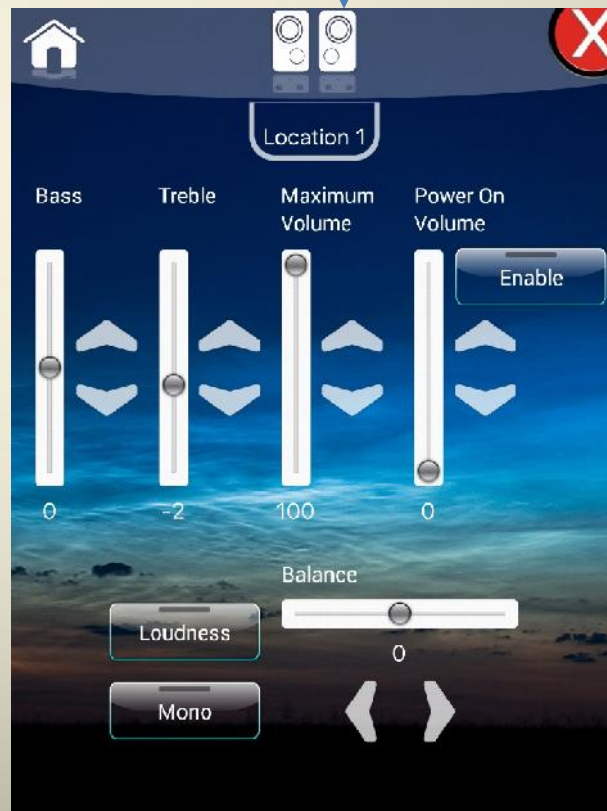

AXium

Audio & Control Systems

Media Manage Digital connections

You should now see this page appear, hold your finger on the speaker icon as a long press to enter the configure area

Axiom

Audio & Control Systems

Media Manage Digital connections

This will open up the device settings page as below, select the Configure button of the Media Manager below

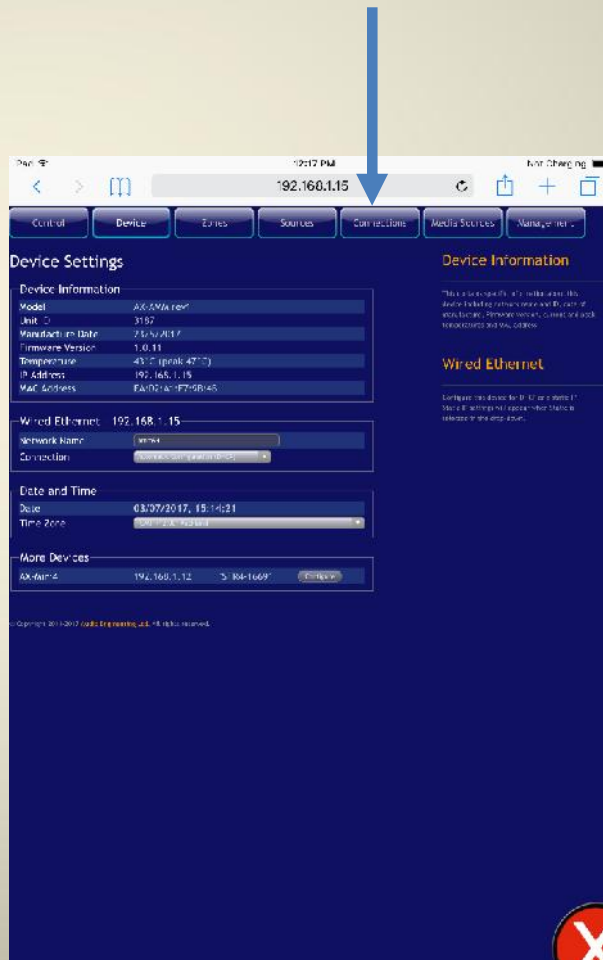

Audio & Control Systems

Media Manage Digital connections

Select and click the Connections tab button

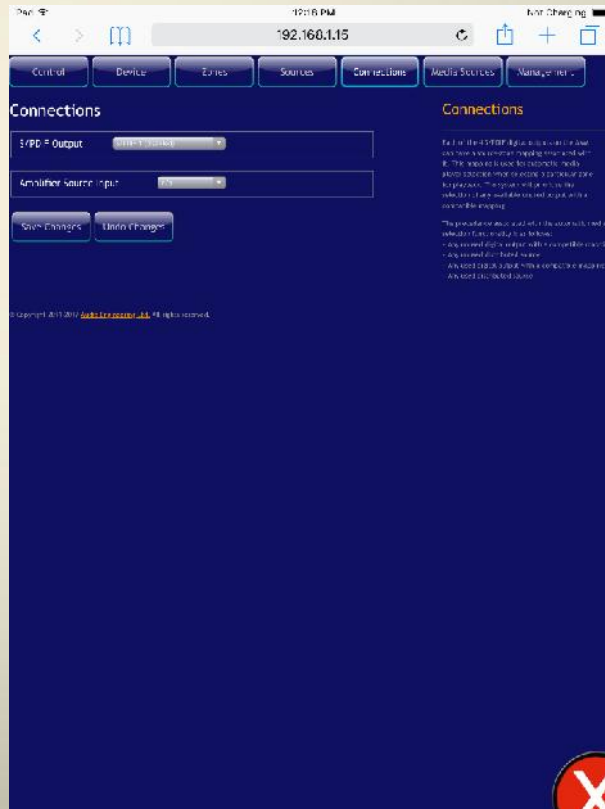

Axiu m

Audio & Control Systems

Media Manage Digital connections

This is where you setup the Source Zone Mapping for the Digital output of the Media Manager with the inputs on your AX400/800 amplifier

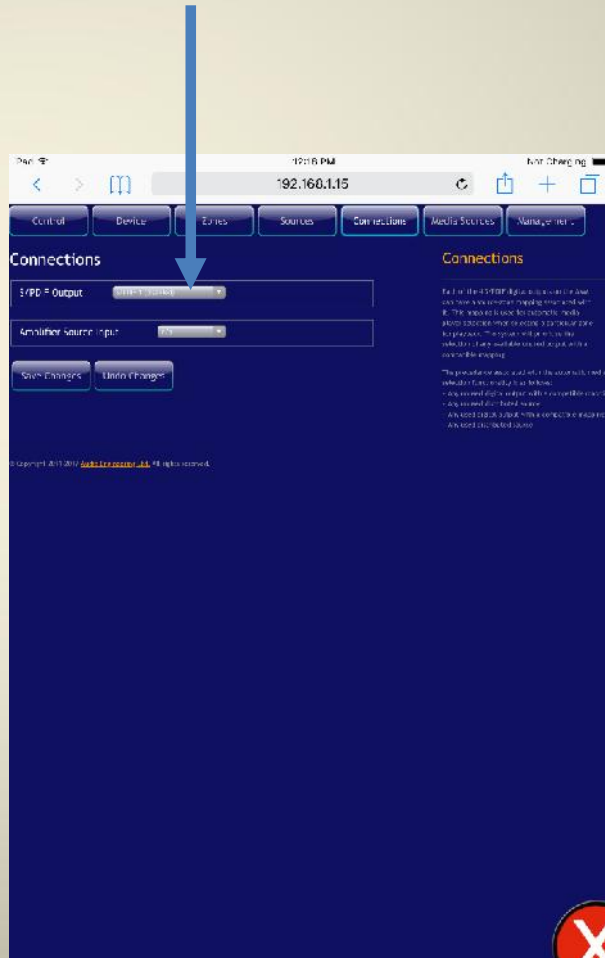

Axiom

Audio & Control Systems

Media Manage Digital connections

Click on the S/PDIF Output tab for the Media Manager

Axiom

Audio & Control Systems

Media Manage Digital connections

This will show the 4 x S/PDIF Outputs that are available.

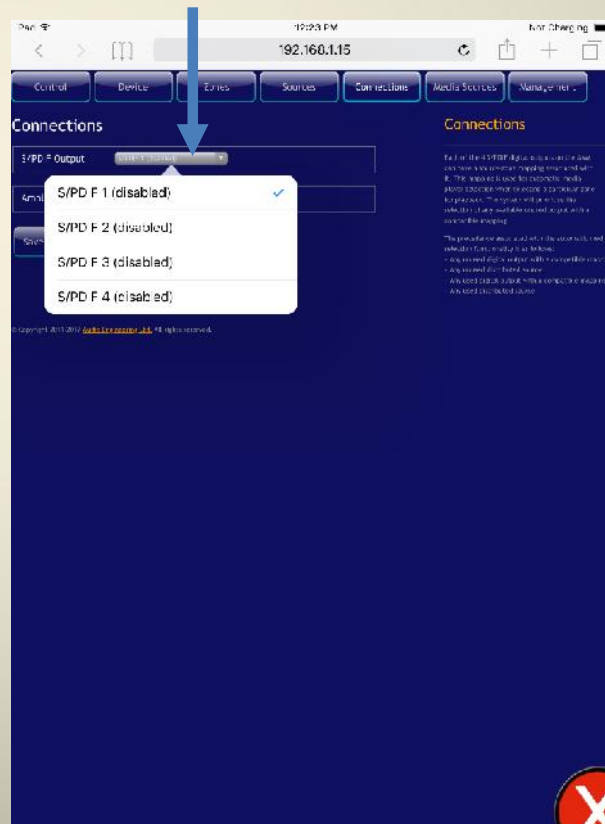

Axiom

Audio & Control Systems

Media Manage Digital connections

Select the appropriate Output from the Media Manager, in this example we have selected S/PDIF Output 1

Axiom

Audio & Control Systems

Media Manage Digital connections

The S/PDIF output will change from disabled to a tick alongside the Output you have selected.

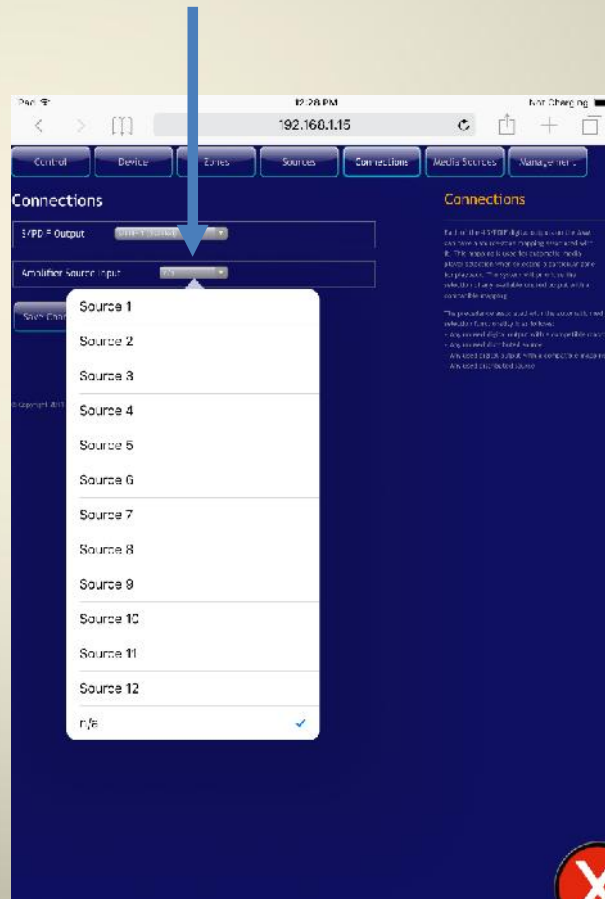

Axiu m

Audio & Control Systems

Media Manage Digital connections

Select the Amplifier Source Input the Media Manager is connected to, this example uses Input Source 1 on the AX400/800 amp.

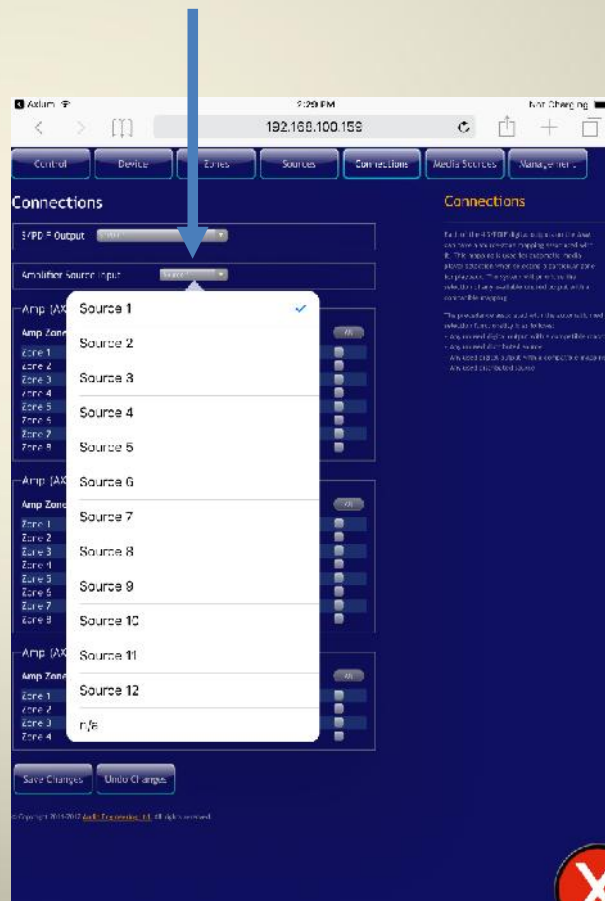

AXium

Audio & Control Systems

Media Manage Digital connections

Once the selected Source Input has been selected a tick will appear alongside your selection.

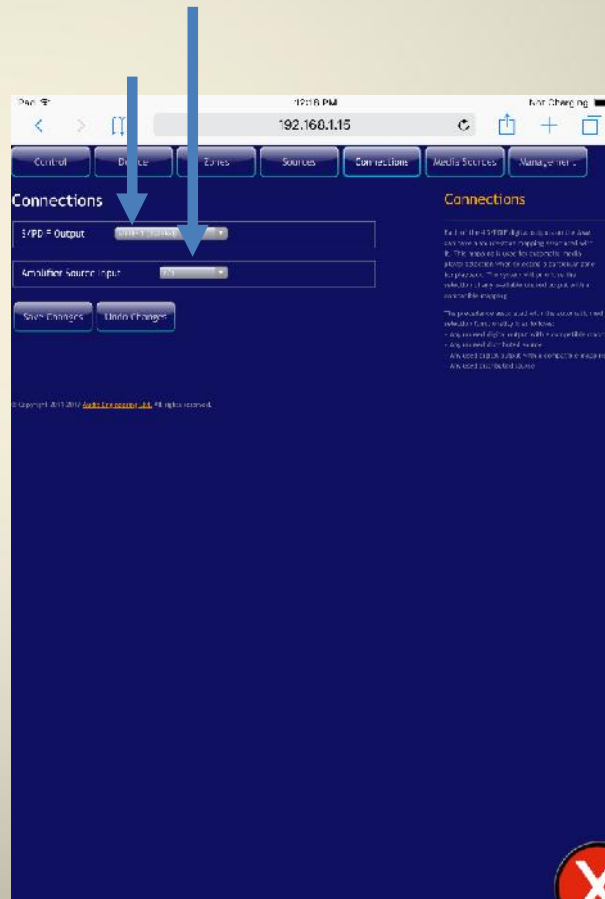

Axiu m

Audio & Control Systems

Media Manage Digital connections

Repeat the process for all the Digital Outputs from the Media Manager you have connected to the AX400/800 Amplifier Inputs. (maximum of 4)

AXium

Audio & Control Systems

Media Manage Digital connections

Once all the Outputs to Inputs have been selected, all the Zones of your Amplifier will appear as below.

Axiom

Audio & Control Systems

Media Manage Digital connections

By selecting the “All” button relating to your specific Amplifier/s will allow all of the Digital Outputs to Inputs to be available in all zones of your project.
