About the AX-AMM:

A new way of thinking

For too long we have been relying on many individual streaming boxes sitting side by side in a rack just to listen to our favorite music. Axiu have looked at this issue and developed a neat and simple solution that provides 12 audio streams in one box, with one power supply and one Ethernet connection all packed into a sleek black box no bigger than your hand and cheaper than what some others charge for two streamers!

4 Digital Coax and 8 network streams (12 streams in total)

The AX-AMM features 4 digital coaxial connections and 8 internal network streamers. (This provides a total of 12 physical sources available to any Axiu amplifier on the network*)

At release the AX-AMM will support Apple Airplay, Spotify Connect, Multiple Pandora accounts, TuneIn, Network shares (UPnP, SMB), play from your device and Axiu Favorites. Axiu will offer new services via a firmware update in the future including IR output to control 3rd party devices like sound bars and AV receivers***. The AX-AMM supports a large list of audio files. Included in this list is AAC (MPEG4), FLAC (lossless) and WAV files. The AX-AMM supports up to 96 kHz sampling rates.

Simple setup

Complete customization is also available via ADP where you can (among other things) decide what outputs are connected to what inputs on the AX-1250 and AX-400 amplifiers as well as what streaming services to allow. A plug into the network and play music functions on the App will be available shortly after being released.

Any source from any amplifier and the Media Manager can be accessed in any Zone

Axiu AX-AMM

Technical Specifications

- Apple Airplay for each media player stream**
- Spotify Connect for each media player stream**
- Multiple Pandora accounts supported**
- Tuneln Internet streaming**
- Local mobile device music playback (iOS and Android) and UPnP push functionality
- Network share (NAS or PC) playback (UPnP, DLNA and SMB)
- 12 Audio Streams:
 - 1 - 4 Digital Coax (PCM)
 - 5 - 12 Network stream via RJ45 (10/100)
- Support for up to 96 KHz 16 Bit stereo audio
- Send IR to control 3rd part devices***
- Auto integration into AX-Mini 4 and AX-1250 media players
- KPC-N applet
- Alarm capabilities via amplifier
- One 12VDC power supply
- Static or DHCP network connections
- Dimensions: 110 L x 89 W x 30 D mm

Audio formats supported as of December 2016	
MP3	Standard and variable bit and sample rates
WAV	8 and 16bit PCM up to 48kHz. No metadata. (96kHz)
M4A/MP4	Up to 48kHz and 576kBits/s. (96kHz)
AAC	48, 96K
OGG/OGA	2Ch, 500kBits
FLA C	Up to 48 kHz and 24 bit 96kHz
HD FLAC 24 / 96	24,96K
HD WAV	24,96K
ALAC	24, 96K
AIFF	24, 96K

* AX-Mini 4 has access to the network streams

* AX-1240 has access to the 8 network streams and the 4 digital coax connections

* AX400 has access to the digital coax connections

**An internet connection is required Internet streaming services. ISP charges may apply. Future services may be added.
