Onkyo & Integra receivers get seamless multiroom integration with Axiom Amplifiers

Wiring Configuration

- 1) Configure S5 to be a digital output source via the config page in the APP.
- 2) Connected a digital cable from S5 to the BD/DVD Input on the Receiver
- 3) Connect an RCA from S1 into the Zone 2 RCA's on the receiver.

Latest Developments

Axiom Multiroom Audio systems extend the ease of integration with Onkyo & Integra product when building a whole house audio system.

You can now stream audio to any zone as well as group zones even if they are Onkyo, Integra or Axiom.

Integration

There are several things that make the integration seamless.

The hardware interconnect paths are setup within the APP so you dont need to know what connection goes to which device, simply select the source and the rest is done for you. Auto discovery of Axiom and Onkyo/Integra product makes integration of the 2 products very simple.

Combining playback of music into multiple rooms is as easy as using all Axiom product, long press the zone name and from the popup select the rooms you want to share the same music, including the receiver/theatre and the APP does the rest for you.
