

Axiom AX-KP4

The machined aluminum chassis of the 4" Android IPC Capacitive Touchscreen provides a unique high-quality finish to suit the most discerning user.

The most compact in a family of 3 touchscreens, with sizes to suit any user requirements. All panels, 4" 5.5" and 8" come preloaded with the Axiom self-discovery APP, providing plug and play functionality out of the box. The app discovers Axiom amplifiers and automatically loads zone information. Functionality can be expanded and the layout customized with the use of Axiom Design Portal software from www.axiumcontrol.com. Customized App designs are uploaded locally with the ability to remotely push changes via our cloud servers.

The dedicated Axiom app provides additional hardware setup functions including brightness and IP configuration.

Connectivity is provided via a PoE ethernet port, or 12v DC and Ethernet or Wi-fi communication, ensuring backwards compatibility with previous KPC touchscreen wiring.

An adaptor plate included with the panel provides a seamless connection between wall plates and the keypad.

Simplified Control

The AX-KP4 offers virtual plug and play functionality. Like the Mobile apps, the inbuilt Axiom APP auto discovers any Axiom Amplifier on the network and loads the zone information.

Backwards compatible

Replace previous model keypads without having to change any existing wiring. Apply 12v and the communication to the amplifiers is established via your local Wifi. the conventional connection is via a PoE lan port. amplifiers do not need to be physically located together.

4" 480 x 480 Capacitive Touchscreen
RK3566 Quad Core Cortex -A55 processor
2GB Memory
12DC
