Systems

# Axium configuration

In order to associate the Alexa user account with the Axium system, the account must be linked to the system. This process is managed on the configuration webpage of the Media Manager (AMM) in the Axium system.

If you know the url of the AMM webpage you may skip the next step (accessing from the mobile app), and go to page 5.

Systems

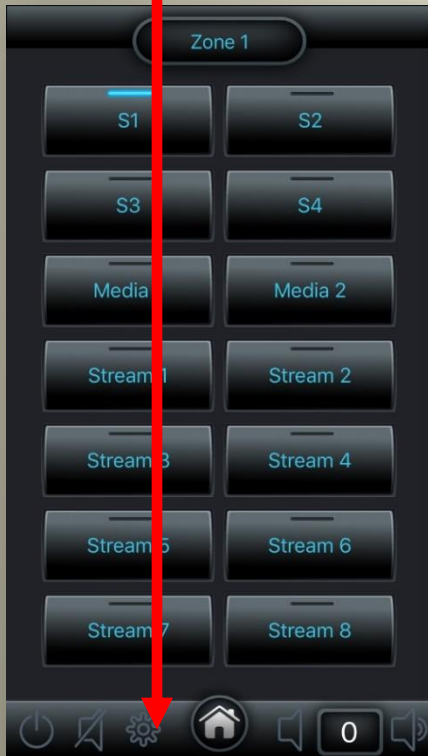

# Axium mobile app – config webpage

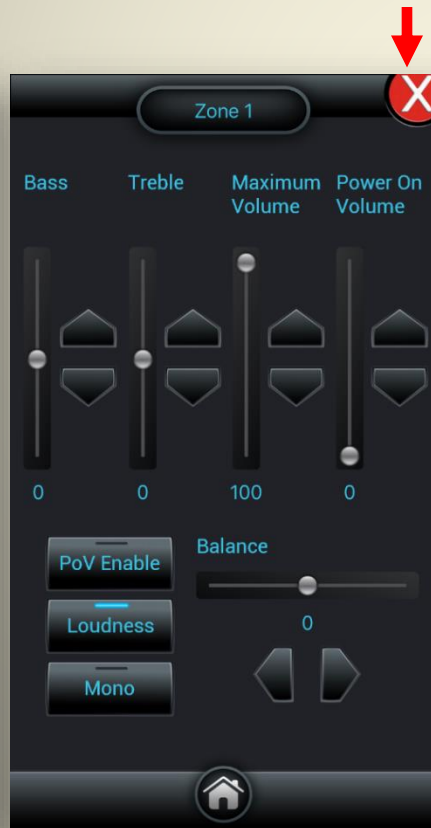

Open your Axium mobile app on your device. Enter the config setup web browser by firstly selecting a source from the home page on the Axium mobile app that will take you to the sources page as shown in fig 1.

Axiu m

Select the Cog icon  
Fig 1

Press the Symbol

Select device config

Audio & Control  
Systems

## Audio & Control Systems

Once in the config page, scroll to the bottom to see the AMM listed and click on the configure button

Wired Ethernet - 192.168.100.111

Network Name: lunar

Connection: Automatic Configuration (DHCP)

Axiom

Audio & Control  
Systems

Once done, the AMM and your Amazon Alexa account will now be linked. The number of linked accounts shown will increase, reflecting the account association.

Audio m

Audio & Control  
Systems

Now if the Axiom skill is installed and linked with Amazon, then you should be able to now inform Alexa about the Axiom zones in the system. This can be done saying "Alexa, discover devices", or by using the interface provided by the Alexa app or webpage.

For sample directives go to page 22.

Audio & Control  
Systems

If the Axiom skill is not found in the Amazon store of your region:

Amazon hides skills from regional stores if they do not provide a translation for the primary language used there.

Please contact us if you would like to help translate into a specific language that Amazon Alexa supports.

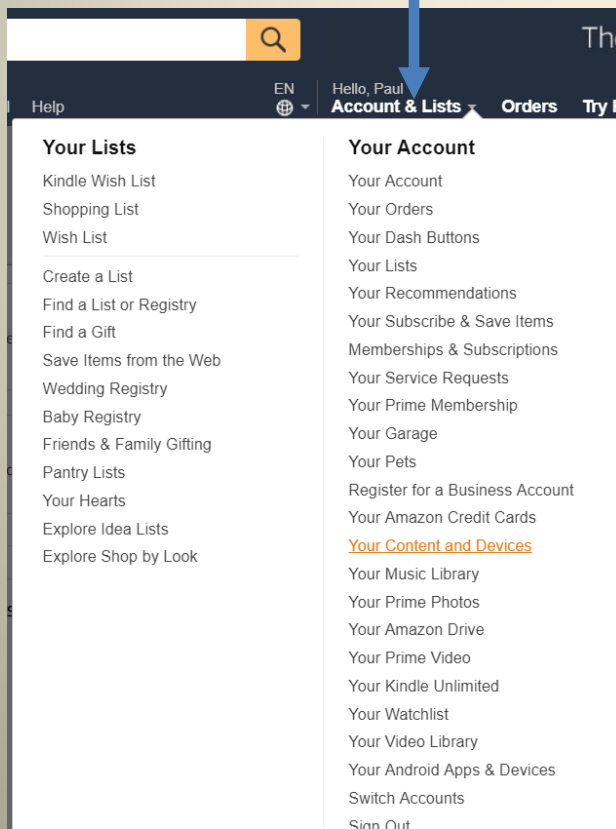

If you wish to proceed with using the skill using English instead, the next several pages describe how to get the skill by setting the Amazon account region to the US and using the English US locale.

Axiom

Audio & Control  
Systems

On your PC, log into Amazon.com. It is important that you check that you are connected to the .com USA site. To check this expand the Accounts & List tab

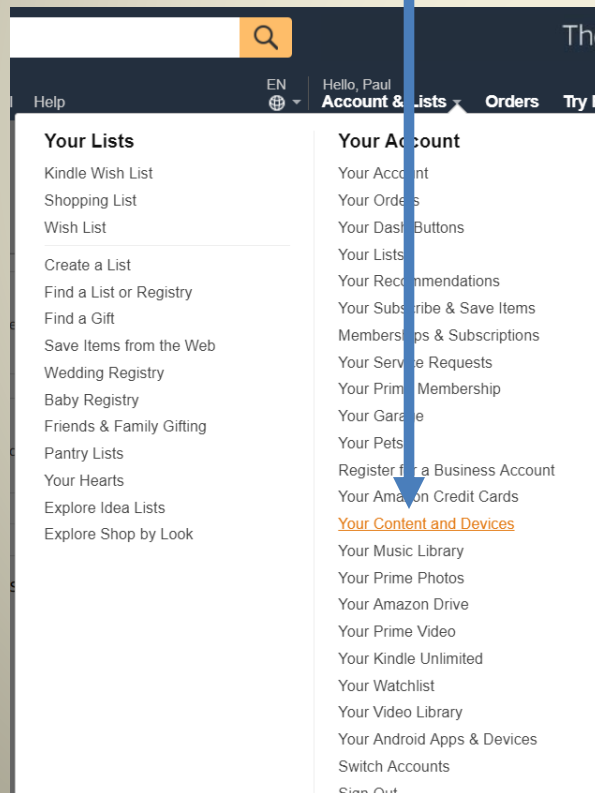

Axiom

Audio & Control  
Systems

Then click on Your Content and devices

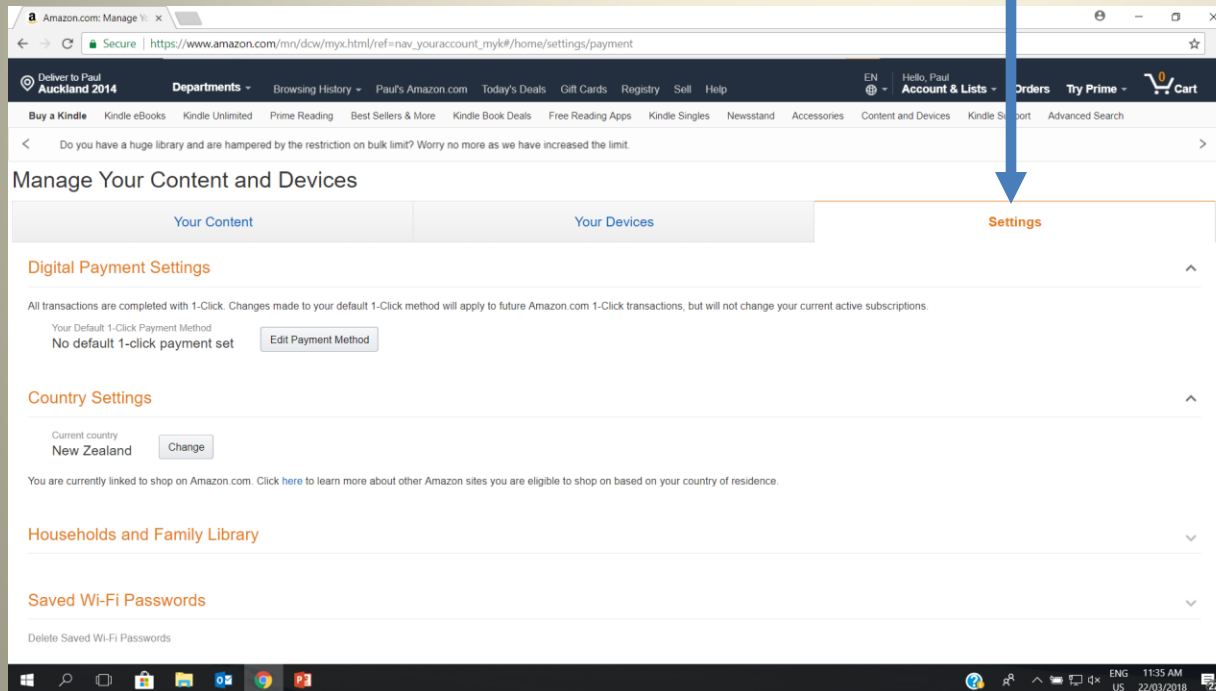

Axiom

Audio & Control  
Systems

Now select the Settings Tab

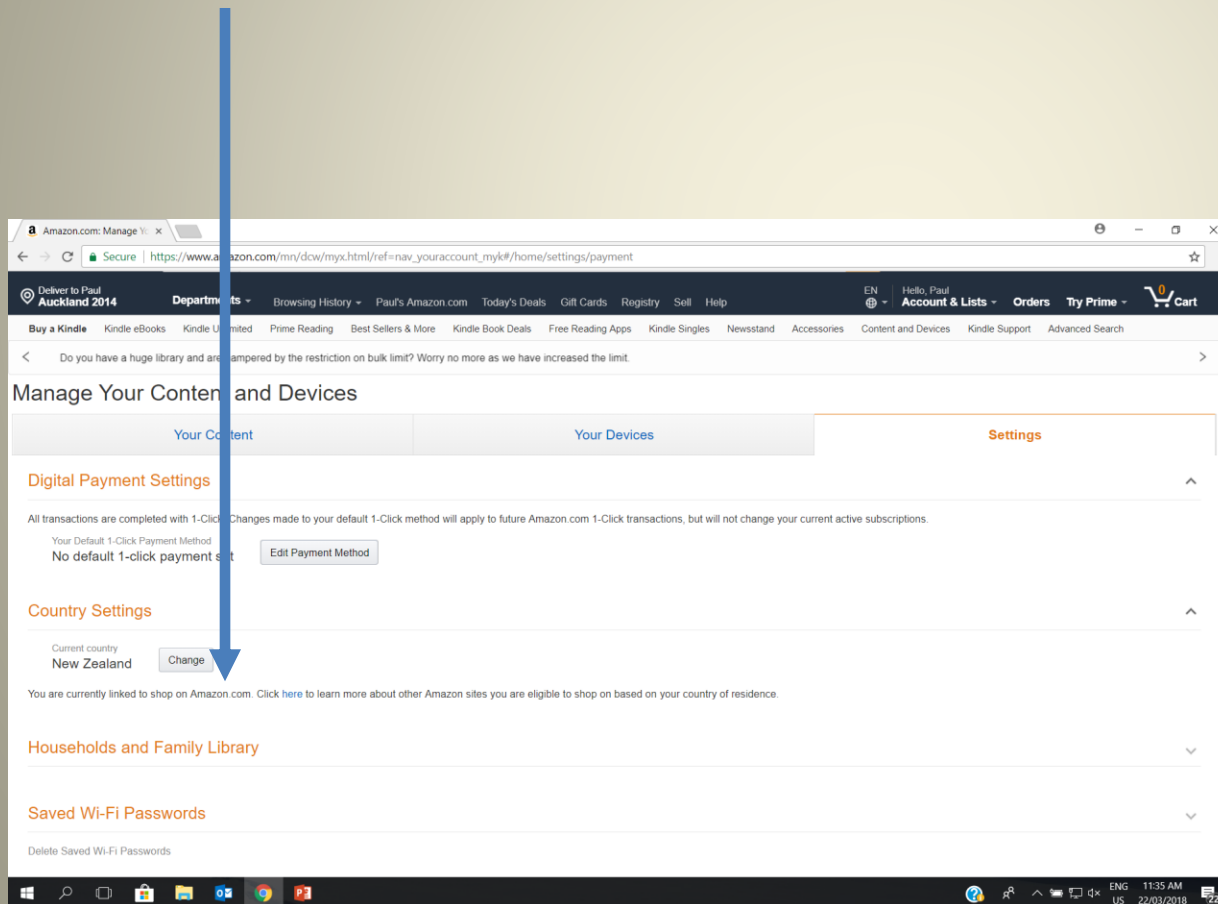

Axiom

Audio & Control  
Systems

Then click on Country settings. It will then display what shop you are linked to, this needs to be the Amazon.com shop.

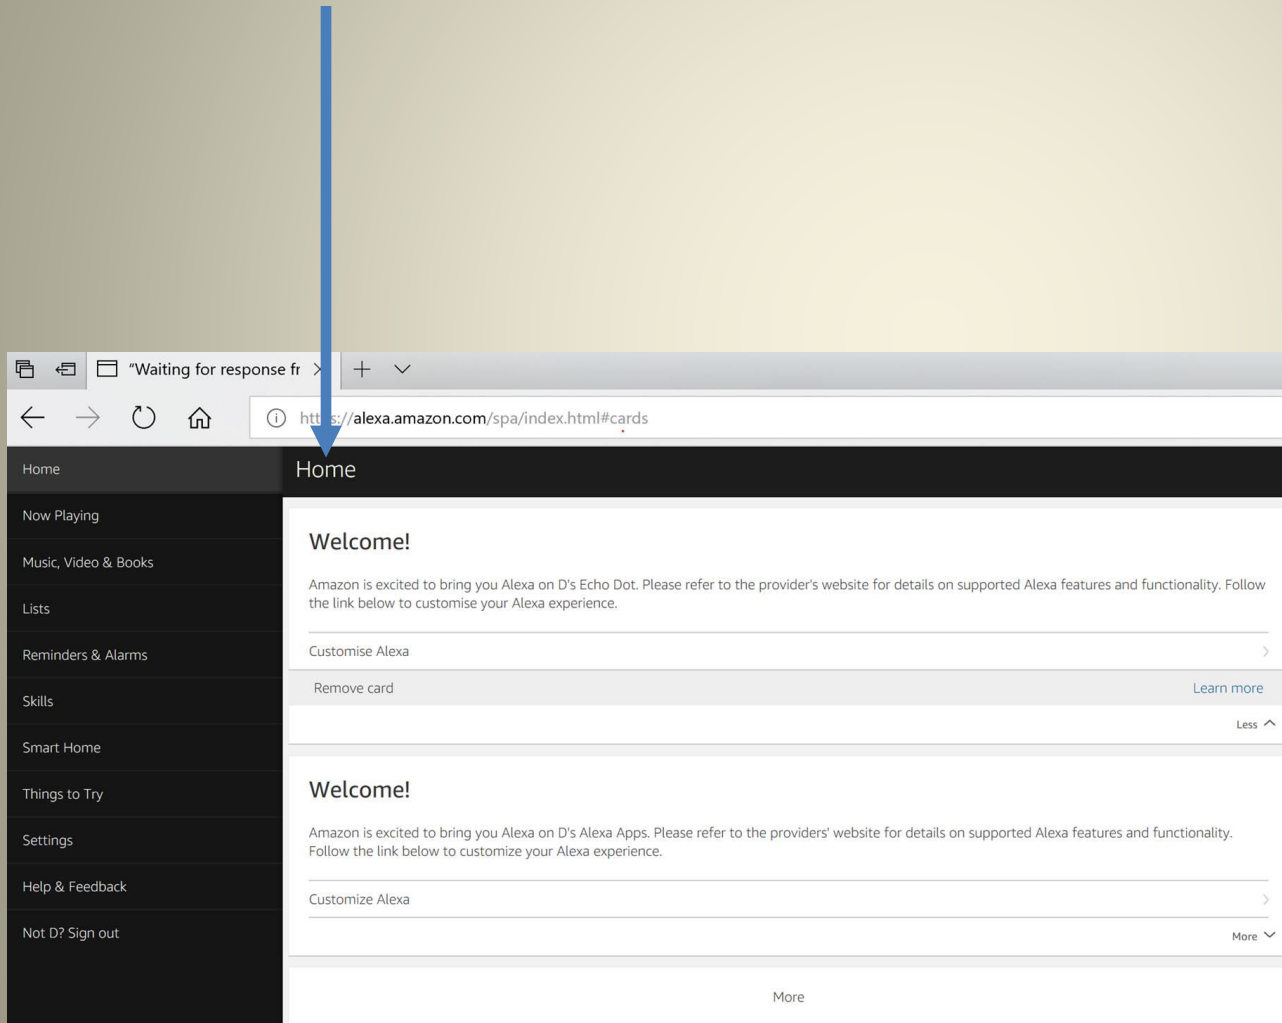

Axiom

Audio & Control  
Systems

In your browser go to [www.alexam.amazon.com](http://www.alexam.amazon.com).  
This will direct you to the home page.

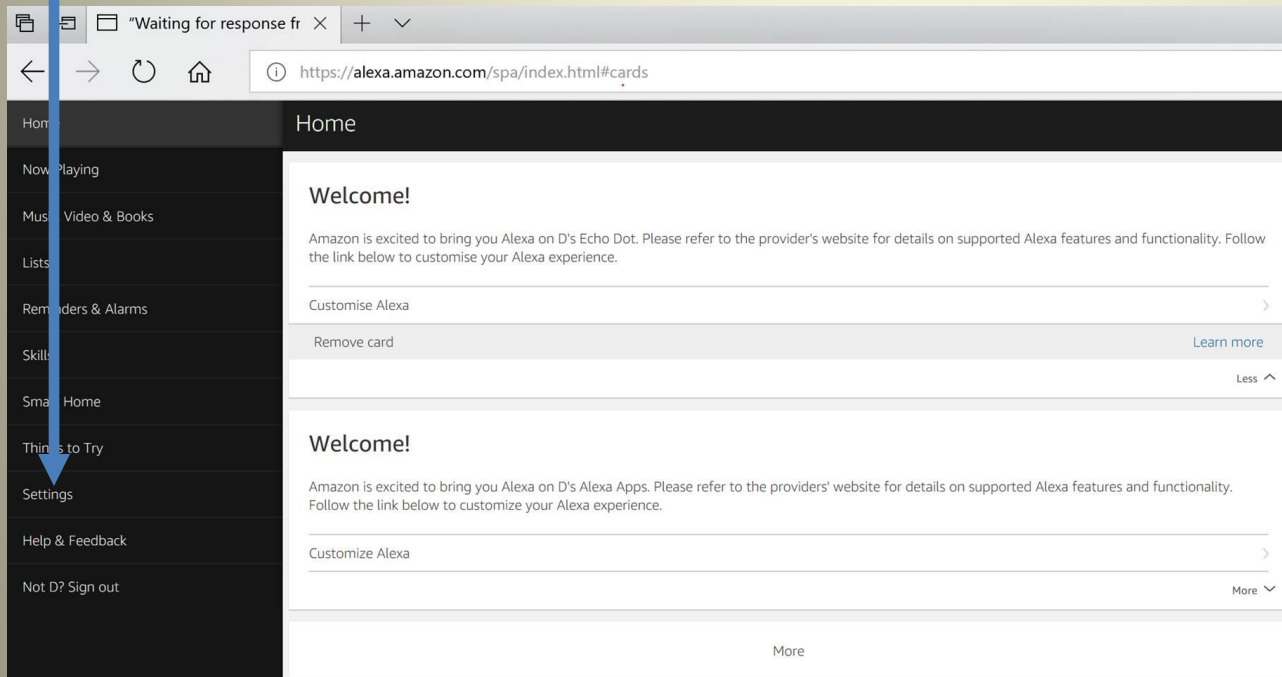

Axiom

Audio & Control  
Systems

Click on the settings tab

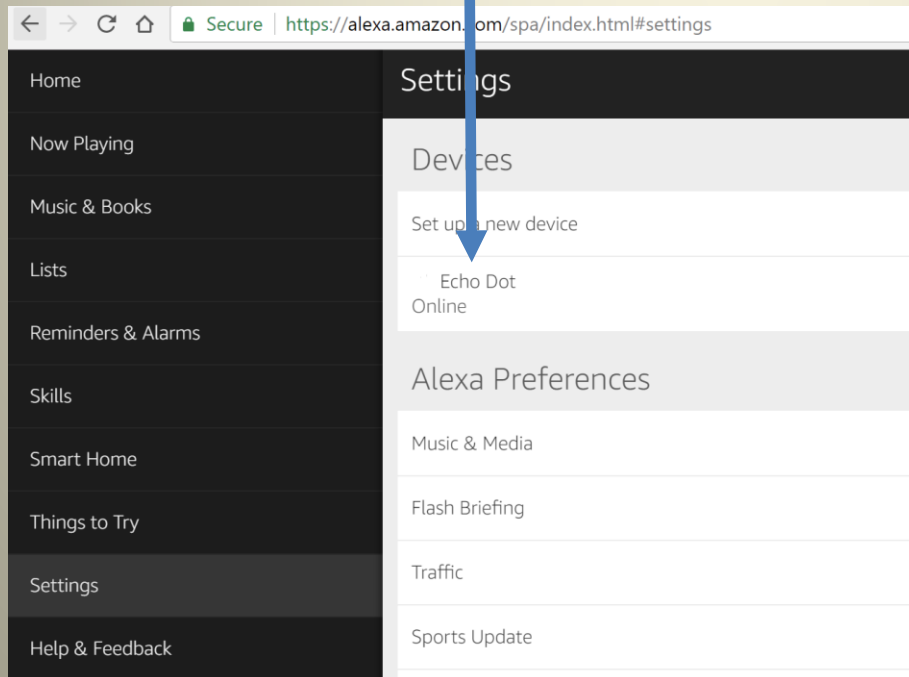

Axiom

Audio & Control  
Systems

Now select the device being used as the Alexa voice assistant. In this case it is an Echo Dot.

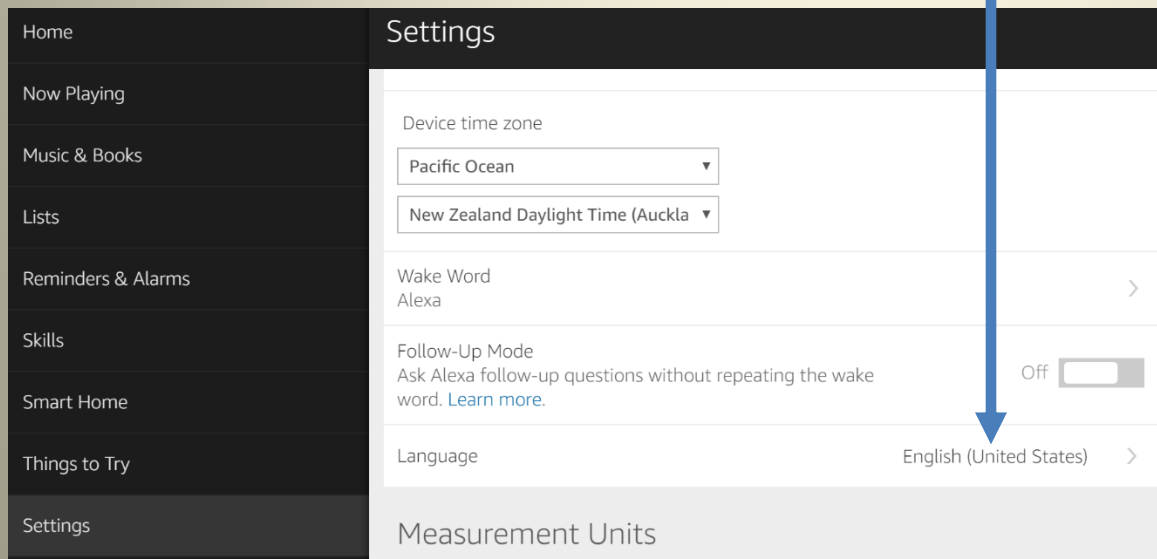

Axiom

Audio & Control  
Systems

Scroll down to the Language area and ensure it is set to English (United States)

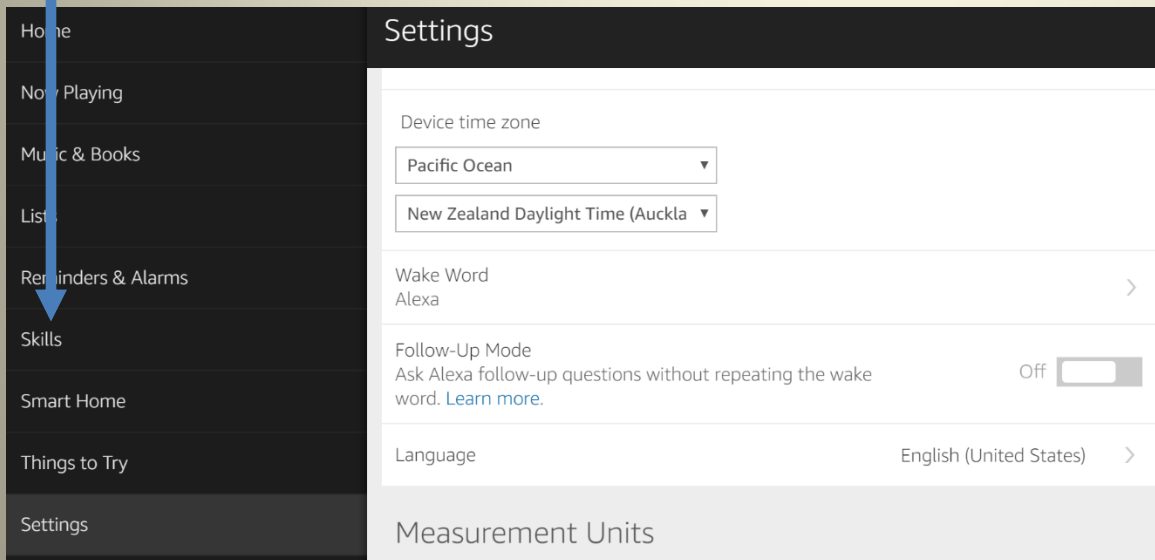

Axiom

Audio & Control  
Systems

Now click on the Skills tab

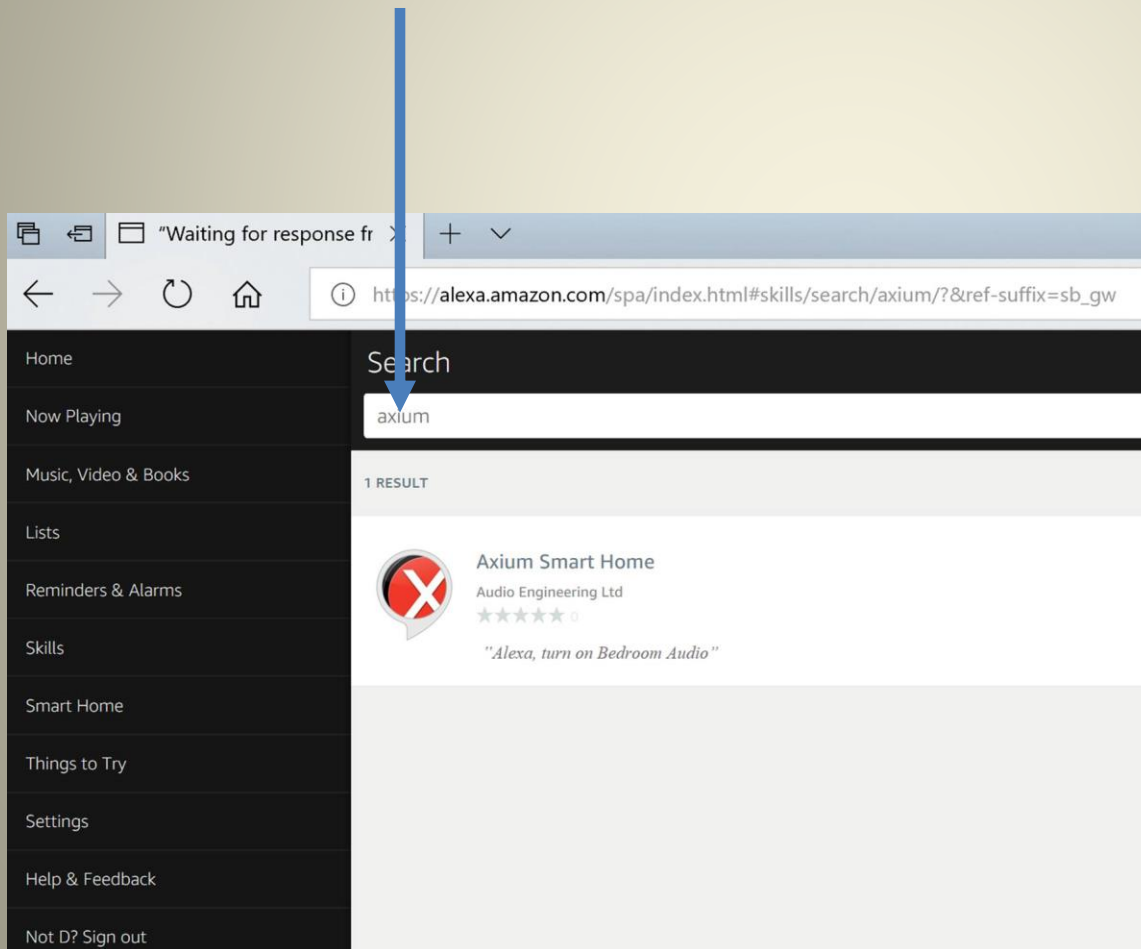

Axiom

Audio & Control  
Systems

Click on the Skills tab and search for the Axiom Skill. Once found you will be told to link the skill with your account.

Axiom

Audio & Control  
Systems

The prompted link starts discovering devices once completed.

| Home               | Devices |
|--------------------|---------|
| Now Playing        |         |
| Music & Books      |         |
| Lists              |         |
| Reminders & Alarms |         |
| Skills             |         |
| Smart Home         |         |
| Things to Try      |         |

| Help & Feedback    |         |
| Not D? Sign out    |         |

|                                  |
|----------------------------------|
| REAR DECK<br>AXMINI4 audio zone  |
| BED DECK<br>AXMINI4 audio zone   |
| DINE DECK<br>AXMINI4 audio zone  |
| GYM<br>AX1250 audio zone         |
| MEDIA ROOM<br>AXMINI4 audio zone |
| MASTER BED<br>AX1250 audio zone  |
| FAMILY<br>AX1250 audio zone      |

Axiom

Audio & Control  
Systems

Once the above processes have been completed, use the Alexa voice directives with your Axium system.

Some sample commands:

alexa, turn on/off Bedroom Audio

alexa, un/mute the Lounge

alexa, turn up the volume by 20 on Kitchen Audio

alexa, turn down the volume on Kitchen Audio

alexa, set the volume of Kitchen Audio to 40

alexa, change the input/source on the Lounge to Stream 1

alexa, next/previous track/song on the Lounge

alexa, pause/resume the Lounge

alexa, play on the Lounge

alexa, stop the Lounge

*the zone name can be often be omitted if a recently used directive provided the context. Otherwise Alexa will likely ask which device for clarification.*

Systems

If you need to remove access to an account from the Axiom side – use the Remove all users button, or perform a factory reset in the webpage.

Unlinking the account used in the skill will also remove access, but it does not disassociate the AMM from the account.
